Key Business Insights

- 

Organic Search is the leading acquisition channel by customer volume.
- 

Premium customers represent 30.4% of the total customer base.
- 

Customers with low satisfaction show the highest churn rate, at approximately 50%.
- 

London generates the highest revenue among the top five cities.

Business Recommendations

- 01.** Optimize Organic acquisition while evaluating channels based on both customer volume and revenue contribution.
- 02.** Prioritize low-satisfaction customers for proactive engagement, as this segment shows substantially higher churn.
- 03.** Increase Premium conversion and focus retention efforts on high-value markets such as London.
